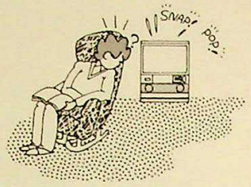
IF THE SET DOES NOT OPERATE PROPERLY

■ If you are unable to restore normal operation by referring to the Operating Instructions, do not attempt any further adjustments. Turn the set off, and call your authorized Panasonic dealer or service technician.

■ Secure service whenever the set is damaged or fails, or whenever a distinct change in performance indicates a need for service.



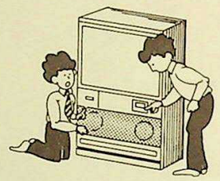
■ It is normal for some TV sets to make snapping or popping sounds, particularly when being turned on or off. If the snapping or popping is continuous or frequent, consult your authorized Panasonic dealer or service technician.

CONTACT AUTHORIZED SERVICE REPRESENTATIVE

■ Never attempt to add, or permit a technician to add, accessories (such as extension speakers, or outlets for record players or tape recorders) to a set that has not been designed for this purpose, since such additions may result in a serious electrical shock hazard.

■ Never place the set on an unstable TV cart or stand.

■ When replacement parts are required, have an authorized Panasonic service technician verify that the replacements have the same safety characteristics as the original part. Unauthorized substitutions may result in fire, shock, or other hazard.



■ Upon completion of any service or repairs to the set, please ask the authorized service technician to perform the safety check described in service literature for the receiver.

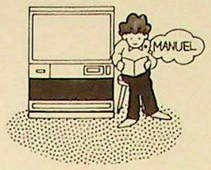
Panasonic®

SAFETY POINTS YOU SHOULD KNOW ABOUT YOUR TELEVISION SET

Thank you for purchasing a Panasonic Color Projection System.
You can be assured that your safety and continued enjoyment were considered in the design and construction of this product, as in all Panasonic products.
Our world wide reputation for quality and performance could not have been achieved without careful consideration of the consumer's confidence and acceptance.
Building a safe product is our responsibility.
This folder offers helpful hints to enable you to enjoy your Panasonic set fully and safely.

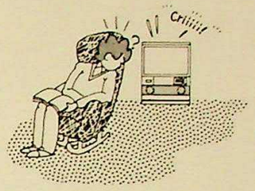
Panasonic®
just slightly ahead of our time

DANS L'ÉVENTUALITÉ D'UN MAUVAIS FONCTIONNEMENT



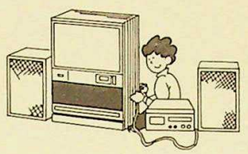
■ S'il advenait que vous ne puissiez régler votre téléviseur en suivant les instructions du manuel, n'insistez pas. Couper le contact et ayez recours à un centre de service Panasonic autorisé.

■ Consultez un technicien chaque fois que votre appareil est endommagé et dès les premiers signes d'un changement anormal dans le fonctionnement.



■ Il est normal que votre téléviseur fasse entendre un petit grésillement, spécialement lorsque le contact est établi ou coupé. Cependant, si ce bruit est fréquent ou continu, consultez votre détaillant ou votre technicien.

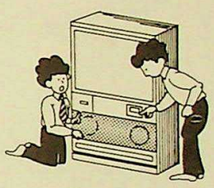
CONSULTEZ TOUJOURS UN CENTRE DE SERVICE PANASONIC AUTORISÉ



■ N'essayez pas ni ne permettez à personne d'ajouter quelque accessoire que ce soit: extension pour haut-parleurs, prises pour tourne-disque ou magnétophone, etc. sur un téléviseur qui n'a pas été conçu à cet effet. De telles modifications peuvent engendrer de sérieux risques de chocs électriques.

■ Ne placez jamais votre téléviseur sur un chariot ou une étagère instable.

■ Lorsque des pièces de rechange sont nécessaires, exigez qu'un technicien Panasonic autorisé s'assure de la similitude des caractéristiques de ces pièces. Des pièces de substitution peuvent éventuellement engendrer de sérieux risques d'incendie, d'électrocution et autres.



■ Après une réparation ou une révision, n'oubliez pas de demander au technicien autorisé d'effectuer les vérifications de sécurité recommandées pour votre téléviseur dans le manuel de service.

Panasonic®

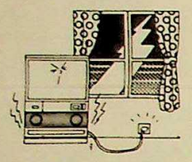
POINTS SÉCURITÉ À CONNAÎTRE AU SUJET DE TOUT TÉLÉVISEUR

Nous vous félicitons d'avoir arrêté votre choix sur ce système de Projection Couleur Panasonic et tenons à vous assurer que votre sécurité et votre satisfaction ont été les facteurs prédominants de sa conception.
La réputation mondiale acquise par Panasonic n'est que l'expression de la confiance témoignée par notre clientèle.
La fabrication d'appareils sûrs est une responsabilité à laquelle nous ne saurions nous soustraire.
Ce dépliant contient quelques conseils pratiques qui vous permettront de profiter pleinement de votre téléviseur Panasonic en toute sécurité.

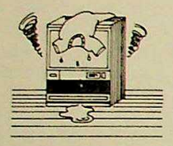
Panasonic®
à l'avant-garde du temps

PROTECTION AND LOCATION OF YOUR COLOR PROJECTION SYSTEM

■ When installing an outside antenna, consider the use of a lightning arrester which is U.L. (Underwriters' Laboratories, Inc.) listed in USA and CSA (Canadian Standards Association) listed in Canada. Use of such an arrester helps to protect both your TV receiver and your home during a lightning storm.

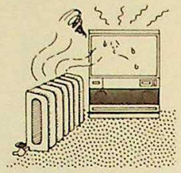


■ For added protection during a lightning storm, and when the set is to be left unattended for an extended period of time, unplug it from the wall outlet. This will prevent possible damage due to the lightning storm or power line surges.

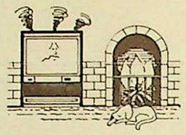


■ The set has slots, or openings in the cabinet and back for ventilation purposes, to provide reliable operation of the receiver, and to protect it from overheating.

■ Never cover the slots or openings with cloth or other material.



■ Never place the set near or over a radiator or heat register.



■ Avoid placing TV set in a "built-in" installation, unless proper ventilation is provided.

■ Avoid exposing the set to rain or excessive moisture as this may result in damage and a potential fire or shock hazard.

OPERATION OF YOUR COLOR PROJECTION SYSTEM

■ Operate the set only from an AC power source as indicated on the back of the cabinet.
If you are not sure of the type of power supplied to your location, consult your television dealer or local power company. (Continued operation at line voltages greater than 128Volts AC will shorten the life of the receiver, and might cause severe damage).

■ Adjust only those controls on the set that are covered in the operating instructions. Improper adjustment of other controls may result in possible damage and will require the services of a technician to restore proper operation.

■ It is advisable to turn the set "off" when it is not being viewed. This will extend the useful life of the set.

FOR YOUR PERSONAL SAFETY

■ *Do not remove the* back cover of the set as this can expose you to very high voltage and other hazards.

■ Never push objects into the set through cabinet slots, as it is possible to touch dangerous voltage points.

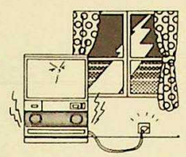
■ If the cabinet has been damaged, do not operate the set as a shock hazard may exist. Have it checked by an authorized service technician before use.

■ Never operate the set if liquid has accidentally spilled into it. Have it checked by an authorized service technician before use.

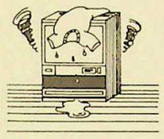
■ Clean the screen with a mild soap and water solution when the receiver is turned off. See instruction manual.

EMPLACEMENT ET PROTECTION DE VOTRE SYSTÈME DE PROJECTION COULEUR

■ Avant d'installer une antenne extérieure, n'oubliez pas de prévoir l'utilisation d'un paratonnerre. Assurez-vous toutefois que ce dernier soit homologué "CSA" (Association Canadienne des Normes). Un tel paratonnerre protégera non seulement votre téléviseur, mais aussi votre maison contre la foudre.

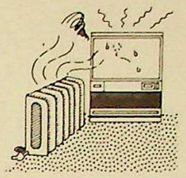


■ Pour une protection accrue durant les orages et lors d'absences prolongées, débranchez le fil d'alimentation de la prise de courant. Cette précaution évitera tout dommage éventuel que pourraient causer la foudre ou un survoltage.

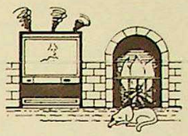


■ Le coffret de votre téléviseur possède des ouvertures d'aération à l'arrière pour permettre une circulation d'air et favoriser son fonctionnement sans risque que les circuits ne surchauffent.

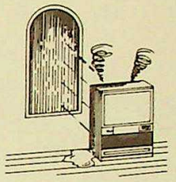
■ Ne recouvrez jamais ces ouvertures avec un linge ou tout autre matériel.



■ Ne placez jamais votre téléviseur sur un radiateur, près d'une bouche d'air chaud ou de toute source directe de chaleur.

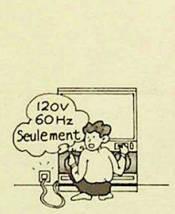


■ Avant d'encastrer votre téléviseur, assurez-vous qu'il y a suffisamment d'espace pour une ventilation adéquate.



■ Afin de prévenir tout risque d'incendie ou de chocs électriques, évitez d'exposer votre téléviseur à la pluie ou à une humidité excessive.

UTILISATION DE VOTRE SYSTÈME DE PROJECTION COULEUR



■ Tel qu'indiqué à l'arrière du coffret, votre téléviseur fonctionne sur courant ordinaire. En cas d'incertitude sur le voltage du secteur dans votre région, consultez votre détaillant Panasonic ou un agent de la compagnie qui vous fournit l'électricité. (Une utilisation prolongée sur c.a. excédant 128 volts peut raccourcir la durée de votre appareil en plus d'être la cause de sévères dommages.)

■ Ne vous servez que des commandes dont l'utilisation est expliquée dans le manuel d'instructions. Une utilisation incorrecte des autres commandes risque d'endommager le téléviseur et nécessiter les services d'un technicien pour rétablir le bon fonctionnement de l'appareil.

■ Il est préférable de couper le contact sur l'appareil lorsque personne ne regarde la télévision. Cette pratique prolongera la durée utile de l'appareil.

POUR VOTRE PROPRE SÉCURITÉ

■ Ne démontez jamais le panneau arrière de votre téléviseur. Vous pourriez vous exposer à certains risques que représente la haute tension.

■ N'introduisez aucun objet dans les ouvertures d'aération afin d'éviter tout court-circuit éventuel.

■ S'il advenait que votre téléviseur soit endommagé, évitez d'établir le contact avant de le faire vérifier par un technicien autorisé.

■ N'établissez pas le contact sur votre téléviseur si, par accident, un liquide quelconque est renversé sur le coffret.

■ Pour nettoyer écran, utilisez un linge doux imbibé d'eau légèrement savonneuse. Toutefois, le fil d'alimentation doit être débranché auparavan (Consultez votre manuel d'instructions.)

IMPORTANT SAFEGUARDS

- Read all of these instructions.
- Save these instructions for later use.

Thank you for purchasing a Panasonic Color Projection System. You can be assured that your safety and continued enjoyment were considered in the design and construction of this product, as in all Panasonic products.

PROTECTION AND LOCATION OF YOUR COLOR PROJECTION SYSTEM

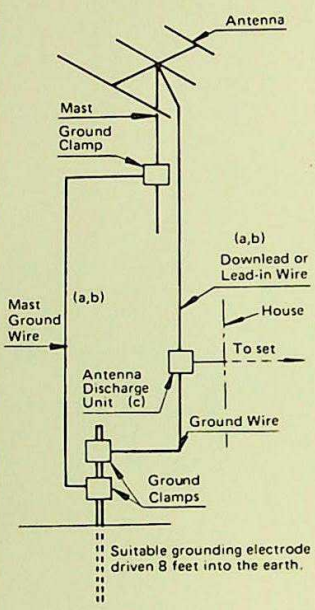

Figure 1.

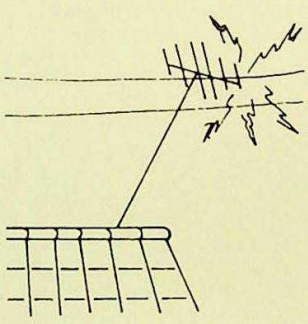
■ If an outside antenna is connected to the color projection system, be sure the antenna system is grounded, so as to provide some protection against atmospheric voltage and static charges. Section 810 of the National Electrical Code, NFPA No. 70-1975, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit (lightning arrester), size of grounding conductors, location of the antenna discharge unit, connections to grounding electrodes, and requirements for grounding the electrode. See Figure 1.

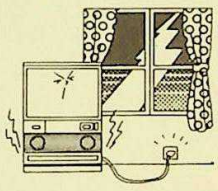
a. Use No. 10 AWG copper, No. 8 AWG aluminum, No. 17 AWG copper-clad or bronze wire, or larger, as ground wires for both mast and lead-in.

b. Secure lead-in wire from the antenna to the antenna discharge unit, and the mast ground wire to house, with stand-off insulators. They should be spaced from 4 feet (1.22 meters) to 6 feet (1.83 meters) apart.

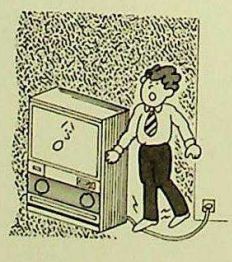
c. Mount antenna discharge unit as close as possible to where the lead-in enters house.



■ An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching power lines or high voltage circuits as contact with them might be fatal.

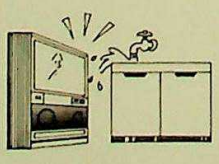


■ For added protection to the color projection system during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the unit due to lightning and power line surges.

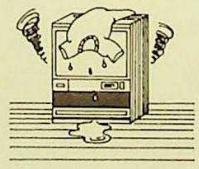


■ Do not allow objects to rest on the power cord. Do not locate this color projection system where the cord will be abused by persons walking on it.

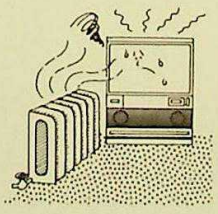
■ Do not place this color projection system on an unstable base or platform. The set may fall causing serious injury to a child or adult and serious damage to the appliance. Locate the unit directly on a level floor for maximum safety.



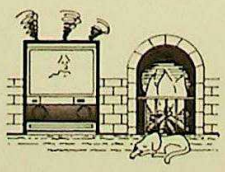
■ Do not use this color projection system near water – for example, near a washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.



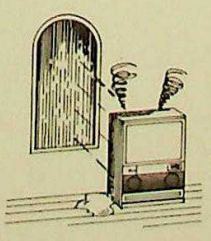
■ The set has slots, or openings in the cabinet and back for ventilation purposes, to provide reliable operation, and to protect it from overheating. Never cover the slots or openings with cloth or other materials.



■ Never place the set near or over a radiator or other heating source.



■ Avoid placing the set in a "built-in" installation, unless proper ventilation is provided.



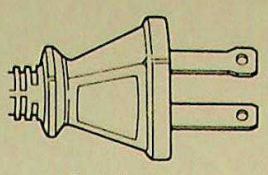
■ Avoid exposing the set to rain or excessive moisture as this may result in damage and create a potential fire or shock hazard.

OPERATION OF YOUR COLOR PROJECTION SYSTEM

■ Operate the set only from an AC 120V 60Hz power source as indicated on the cabinet back. If you are not sure of the type of power supplied to your location, consult your television dealer or local power company. (Continued operation at line voltages greater than 128 Volts AC will shorten the life of the receiver, and might even cause severe damage).

■ Adjust only those controls on the back of the set that are covered in the operating instructions. Improper adjustment of other back controls may result in possible damage and will require the services of a technician to restore proper operation.

■ It is advisable to turn the set "off" when it is not being viewed. This will extend the useful life of the set.

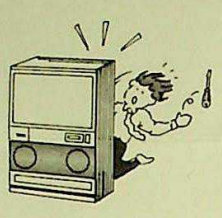


Polarized Plug

■ This television receiver is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature.
If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician. Do not defeat the safety purpose of the polarized plug.

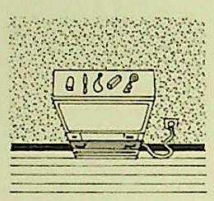
■ Do not overload wall outlets and extention cords as this can result in fire or electric shock.

FOR YOUR PERSONAL SAFETY



■ Follow all warnings and instructions marked on the television receiver.

■ Do not attempt to service this color projection system yourself by opening or removing covers that may expose you to dangerous voltages or other hazards. Refer all servicing to qualified service personnel.



■ Never push objects of any kind into this set through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

■ When a color projection system reaches the end of its useful life, improper disposal could result in a projection tube implosion. Ask a qualified sevice technician to dispose of the set.

■ Unplug this color projection system from the wall outlet and refer servicing to qualified service personnel under the following conditions:

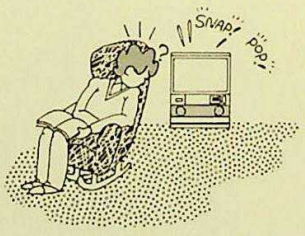
a. When the power cord or plug is damaged or frayed.
b. If the color projection system has been dropped or the cabinet has been damaged.
c. If liquid has been spilled into the color projection system.
d. If the color projection system has been exposed to rain or water.
e. When the color projection system exhibits a distinct change in performance-this indicates a need for service.
f. If the color projection system does not operate normally by following the operating procedures.

■ Unplug this color projection system from the wall outlet before cleaning. Do not use liquid or aerosol cleaners.
Use a damp cloth for cleaning the cabinet, and the supplied cloth for the screen.

IF THE SET DOES NOT OPERATE PROPERLY

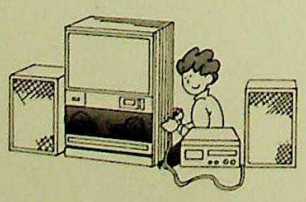
■ If the color projection system does not operate normally by following the operating instructions, unplug it from the wall outlet and refer servicing to qualified service personnel. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the color projection system to normal operation.

■ Secure service whenever the set is damaged or fails, or whenever a distinct change in performance indicates a need for service.



■ It is normal for some sets to make snapping or popping sounds, particularly when being turned on or off. If the snapping or popping is continuous or frequent, consult your authorized Panasonic dealer or service technician.

CONTACT AUTHORIZED SERVICE REPRESENTATIVE



■ When additional accessories or equipments are required in order to expand the system (such as external speakers, video tape recorders, etc.), use only accessories or equipments recommended by the manufacturer, or consult your anthorized Panasonic dealer or service technician. Unapproved accessories may result in fire, electrical shock, or other hazards.

■ When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer.
Unauthorized substitutions may result in fire, electric shock, or other hazards.

■ Upon completion of any service or repairs to this color projection system, ask the service technician to perform routine safety checks to determine that the set is in safe condition.

LIMITED ONE YEAR IN HOME SERVICE WARRANTY
PANSONIC COLOR PROJECTION SYSTEM

PANASONIC COMPANY, PHI, or PSC will repair and exchange parts for this Projection System free of charge in the U.S.A. and Puerto Rico in the event of a manufacturing defect, as follows:

Parts

New or comparable rebuilt parts in exchange for defective parts for one year after original purchase.

Labor

In-Home Service for one year after original purchase.

Service

In-Home Service can be obtained during the warranty period by contacting your dealer.

A purchase receipt or other proof of date of original consumer purchase will be required before warranty performance is rendered.

This warranty covers normal consumer use and does not cover damage which occurs in shipment or failure which results from alteration, accident, misuse, abuse, neglect, installation, adjustment of customer controls, reception problems resulting from inadequate signal pick-up by antenna or improper maintenance.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

If a problem with this Panasonic Color Projection System develops during the warranty period, contact your Panasonic dealer. If the problem is not handled to your satisfaction, then write to the Panasonic Consumer Affairs Division at the company address indicated above.

PANASONIC CANADA

DIVISION OF MATSUSHITA ELECTRIC OF CANADA LIMITED

5770 AMBLER DRIVE, MISSISSAUGA, ONTARIO L4W 2T3

COLOR TV WARRANTY

Panasonic Canada warrants this product to be free from defects in material and workmanship and agrees to remedy any such defect. This warranty covers 1 year labor, 1 year parts and 2 years picture tube, from the date of original purchase.

This warranty does not apply outside of the boundaries of Canada or to any product which has been improperly installed, subjected to misuse or abuse, shipping damage, or which has been altered or repaired in any way that affects the reliability or detracts from the performance, nor does it cover any product which is used commercially.

During the second year if a picture tube becomes defective it will be exchanged at no charge, but the cost of labor for removing and installing picture tubes must be paid by the owner.

WARRANTY SERVICE PORTABLE MODELS (20 inch and under)

"IN WARRANTY" service can be obtained by delivering your product to an Authorized Panasonic Servicentre. To locate the Authorized Panasonic Servicentre refer to your dealer or to the directory of Authorized Servicentres packed with each product.

WARRANTY SERVICE TABLE OR CONSOLE MODELS (20 inch and over)

"IN WARRANTY" service can be obtained by contacting your dealer or an Authorized Panasonic Servicentre. Refer to the directory of Authorized Servicentres packed with each product.

PROOF OF PURCHASE DATE

A purchase receipt or other proof of date of original purchase will be required before warranty service is performed.

STATUTORY WARRANTIES

The provisions of this additional written warranty are in addition to and not a modification of or subtraction from the statutory warranties and other rights and remedies contained in any applicable legislation.

FOR YOUR PROTECTION

Complete the Warranty Registration Card and mail immediately.

CERTIFICAT DE GARANTIE

TÉLÉ-COULEUR

Panasonic Canada garantit cette télé-couleur contre tout vice de fabrication et accepte de remédier à toute défectuosité pendant un (1) an de la date d'achat originale, pièces et main-d'oeuvre (2 ans sur la lampe-écran).

Cette garantie n'est valide qu'au Canada et ne couvre pas les dommages résultant d'un usage abusif, impropre ou d'un raccordement incorrect, ainsi que les dommages découlant d'accident en transit ou de manipulation. De plus, si le téléviseur a été altéré ou transformé de façon à en modifier l'usage pour lequel il a été conçu ou utilisé à des fins commerciales, cette garantie devient nulle et sans effet.

Advenant que la lampe-écran fasse défaut durant la deuxième année, elle sera remplacée sans frais. Cependant, les frais d'installation devront être assumés par le propriétaire de l'appareil.

RÉPARATION SOUS GARANTIE, MODÈLES PORTATIFS (20" ou moins)

Toute réparation sous garantie peut être obtenue dans un centre de service Panasonic autorisé. Pour connaître l'adresse d'un centre de service Panasonic autorisé, consultez la liste incluse avec chaque appareil ou voyez votre détaillant Panasonic.

RÉPARATION SOUS GARANTIE, MODÈLES DE TABLE OU CONSOLES (20" et plus)

Toute réparation sous garantie peut être obtenue en contactant votre détaillant ou un centre de service Panasonic autorisé. Consultez la liste des centres de service Panasonic autorisés incluse avec chaque appareil.

PREUVE DE LA DATE D'ACHAT

Votre facture ou autre preuve de la date d'achat originale sera exigée pour toute réparation sous le couvert de cette garantie.

GARANTIES STATUTAIRES

Les dispositions stipulées dans ce certificat supplémentaire sont additionnelles et n'altèrent ni ne modifient en aucune façon les garanties statutaires, droits et recours que peut prévoir toute législation en vigueur.

POUR VOTRE PROTECTION

Complétez et postez sans délai la carte d'homologation de garantie.

IMPORTANT NOTICE

Two warranty cards are enclosed, one is only for products purchased in the United States. The other is only for products purchased in Canada.
Warranty service may be obtained solely in the country where purchased in accordance with the appropriate warranty card.
Please discard inapplicable warranty card.

AVIS IMPORTANT

Deux certificats de garantie sont inclus avec cet appareil.
L'un couvre les appareils achetés aux Etats-Unit, tandis que le deuxième couvre les appareils achetés au Canada.
Toute réparation sous garantie ne peut être obtenue que dans le pays où l'appareil a été acheté, et ce, conformément au certificat de garantie approprié.
Prière de détruire le certificat non applicable.

Your Panasonic Product is designed and manufactured to ensure a minimum of maintenance. However, should your unit ever require service, a nationwide system of AUTHORIZED INDEPENDENT SERVICENTERS is maintained by Panasonic, PHI and PSC to support your Panasonic Warranty.

Panasonic also has its own FACTORY SERVICENTERS for Panasonic, Technics by Panasonic and National brand products in the Continental U S.A., Hawaii and Puerto Rico.

If service is not available in your community at this time, carefully pack the unit, preferably in the original carton(s) and ship the product, prepaid and insured, to one of our "Mail-In" Servicenters, setup to service and return your unit as promptly as possible. The four "Mail-In" Servicenters are listed on reverse side. Be sure to include within carton a complete description of the problem you are experiencing with your unit.
